

testing to be conducted more than 30 days prior to the date of export if required or allowed by the receiving country, and the tuberculin test may be conducted within the 90 days prior to the date of export. The test for brucellosis shall be conducted in a cooperating State-Federal laboratory¹ in accordance with the Recommended Brucellosis Eradication Uniform Methods and Rules.

(d) *Movement in cleaned and disinfected carriers or containers.* The origin health certificate accompanying animals shall be accompanied by a statement from the issuing accredited veterinarian or inspector that the means of conveyance or container has been cleaned and disinfected since last used for animals with a disinfectant approved under § 71.10 of this chapter, prior to loading, or that the carrier or container has not previously been used in transporting animals.

(e) *Clean and disinfected facilities for unloading animals.* Animals intended for exportation to Mexico or Canada or enroute to a port of embarkation shall be unloaded only into a facility which shall have been cleaned and disinfected with a disinfectant approved under § 71.10 of this chapter, under the supervision of an inspector or an accredited veterinarian prior to such unloading. A statement certifying to such action shall be attached to the origin health certificate by the supervising inspector or accredited veterinarian.

§ 91.4 Other movements and conditions.

The Administrator may, upon request in specific cases, permit the exportation of livestock not otherwise provided for in this part under such conditions as he may prescribe in each specific case to prevent the spread of livestock diseases and to insure the humane treatment of the animals while in transit.

[43 FR 27171, June 23, 1978. Redesignated at 45 FR 86412, Dec. 31, 1980, and amended at 57 FR 23047, June 1, 1992]

Subpart B—Diagnostic Tests, Treatments

SOURCE: 45 FR 86412, Dec. 31, 1980, unless otherwise noted.

§ 91.5 Cattle.

In order to be eligible for export, cattle shall be tested with results as specified in this section, and the origin health certificate shall specify the type of tests conducted, the dates of the tests, and the results of the tests.

(a) *Tuberculosis.* All cattle over 1 month of age shall be negative to a caudal intradermal tuberculin test using 0.1 ml. of tuberculin with a reading obtained 72 hours (plus or minus six hours) after injection as prescribed in Veterinary Services Memorandum 552.15 "Instructions and Procedures for Conducting Tuberculin Tests in Cattle," section VIII A.²

(1) *Provided that*, such tests are not required for any of the following:

(i) Cattle exported directly to slaughter in a country that the Administrator has determined has an acceptable tuberculosis surveillance system at slaughter plants and that agrees to share any findings of tuberculosis in U.S. origin cattle with APHIS;

(ii) Cattle exported directly to slaughter from a State designated as an Accredited-Free State in § 77.7 of this chapter;
